🇸🇦 Saudi National 📍 KAUST, Saudi Arabia

Fourth-year PhD candidate specializing in multimodal LLMs, VLMs, and VLAs for autonomous driving, motion prediction, and safety-aware planning.

Research internship goal: Seeking a publication-oriented research internship in multimodal autonomy research, especially perception, planning, world models, and embodied AI. Available immediately.

RESEARCH INTERESTS

- Multimodal LLMs, VLMs, and VLAs for autonomous driving perception, planning, and generation
- Motion prediction, trajectory generation, world models, and structured reasoning in dynamic scenes
- Safety-aware instruction tuning and evaluation for autonomy systems
- Large-scale autonomous-driving data curation, benchmarking, and closed-loop analysis

SKILLS

Multimodal / VLM / VLA: Qwen-VL, LLaVA, CLIP/SigLIP, instruction tuning (SFT/DPO/GRPO), multimodal reasoning.

Autonomous Driving / Motion: BEV and trajectory representations, perception-prediction-planning pipelines, open/closed-loop evaluation, Waymo/nuScenes/nuPlan workflows.

Training & Systems: PyTorch, multi-GPU training, Slurm, vLLM inference, large-scale preprocessing.

Programming: Python, OpenCV, MATLAB, R, TensorFlow (basic), C++ (basic).

Deep Learning: Vision transformers, temporal and generative models, end-to-end AD systems, graph deep learning.

Additional Skills: Data curation, metadata cleaning, parallel processing, digital signal/image processing.

EDUCATION

PhD	King Abdullah University of Science and Technology (KAUST) , Electrical & Computer Engineering, Thuwal, Saudi Arabia	01/2022 - present
	• GPA: 3.79/4.0 • 06/2023 - present: Prof. Mohamed Elhoseiny; deep learning, motion forecasting, and large language models; current research in AD with reasoning and coral reef identification benchmark • 01/2022 - 05/2023: Prof. Tareq Al-Naffouri; deep learning and human action prediction	
MS	King Abdullah University of Science and Technology (KAUST) , Electrical & Computer Engineering, Thuwal, Saudi Arabia	01/2020 - 01/2022
	• GPA: 3.83/4.0 • Advisor: Prof. Tareq Al-Naffouri • Focus: Deep Learning and Human Action Prediction	
BS	King Fahd University of Petroleum and Minerals (KFUPM) , Electrical Engineering, Dhahran, Saudi Arabia	08/2014 - 12/2019
	• GPA: 3.43/4.0 • Concentration: Signal Processing and Wireless Communication • Senior Project: Real-Time AI Surveillance System • Junior Project: Heatstroke Flexible Sensors	
-	Georgia Institute of Technology , Exchange Student, Atlanta, GA, USA	08/2018 - 12/2018

OTHER ACADEMIC CONTRIBUTIONS

Reviewer: WACV 2026, ICCV2025 Workshop Proceedings, ICCV 2025 Workshop CV4E, ACML 2024, SIGGRAPH Asia 2024.

Workshop Organizer: CVPR 2024 – C3DV: 2nd Workshop on Compositional 3D Vision.

06/2024

Contributed to the KFUPM DSP Lab Manual: OpenCV Face-Recognition Experiment.

07/2021

AWARDS & FUNDING

CEMSE Dean's List Award Academic Year 21/22 (awarded to the top-20% students)

\$1M in Research Funding: NEOM Ocean Science and Solutions (OSSARI) Research Fund (\$600k, 2024); KAUST Translational Fund (\$450k, 2022).

Projects Awards: [Start Smart](#) by Community Jameel Foundation and Bab Rizq Jameel (1st place, \$9k, EcoStream Project, 2024), [Digital Innovation Award](#) by the Saudi Ministry of Communications and Information Technology (1st place Smart-Tap project, \$21k, 2022), KFUPM Undergraduate Senior-Project Award (1st place, AI Surveillance Project, 2019), SSI Internship Poster Competition (2nd place, Indoor localization project, 2019).

EXPERIENCE

KAUST Academy 1-Week AI specialization Instructor: Taught undergraduate students fundamentals of AI (ML, CV, neural networks, Python). 01/2025

KAUST Saudi Summer Internship (SSI): Worked on improving ultrasonic indoor localization by filtering out non-line-of-sight signals with machine learning. 05/2019 - 08/2019

KFUPM IEEE Student Branch Publicity Chair: Organized various events and seminars, and promoted IEEE branch activities to KFUPM students. 01/2018 - 01/2019

SELECTED PROJECTS

iMotion-VLM: End-to-End Vision-Language Autonomous Driving System

- Built a reasoning-centric end-to-end planning system using multimodal LLMs for autonomous driving.
- Designed a multi-step reasoning and high-level plan data generation pipeline on nuScenes and safety-focused evaluation settings.

iMotion-LLM, InstructNuPlan / InstructWaymo Datasets

- Developed a safety- and feasibility-aligned data generation pipeline for instruction-following in trajectory prediction using vectorized BEV representations.
- Trained and evaluated instruction adherence and safety alignment by coupling LLMs with traditional trajectory prediction modules.

ReefNet (925K Annotations): Large-Scale Dataset and Benchmark

- Built a 925K-annotation benchmark for hard coral identification in collaboration with marine ecologists.
- Benchmarked ViT/BEiT/BioCLIP/CLIP/SigLIP models and designed a rigorous data verification and quality-control pipeline.

Smart-Tap: Fully Integrated AI System for Water Valve Control

- Built a proof-of-concept prototype with real-time inference for future action anticipation.
- Collected and annotated data with pose estimation, and trained spatio-temporal graph convolutional networks.
